## Customer Reviews

For any state prisoner about to enter the complicated, confusing world of the federal courts to see relief from an unconstitutional conviction, I cannot recommend this book enough. A couple of other options exist in the marketplace, but only Smith's Guide to Habeas Corpus offers the combination of expertise, thoroughness, and value that makes it a must-have for the incarcerated pro se litigant. Ordinarily I don't put much stock in jailhouse attorneys. Z.A. Smith however, gets my praise. He has a well-deserved reputation as a first-rate litigator, having won innumerable judgments for the many individuals he has worked for over the years. When the attorney hired to handle my own federal habeas filing dropped my case without warning (and with a deadline looming). Smith put everything he had into salvaging the wreck left by that attorney. So impressive was his knowledge, and so admirable his commitment to righting judicial wrongs, that I asked him to apply his prowess to my U.S. Supreme Court petition for a writ of certiorari as well. Buying a copy of Smith's Guide to

Habeas Corpus is the next-best thing to having Smith personally working on your case. I wish he had written this book years ago, before that shady lawyer ripped me off â ” I'd have happily let Smith guide me through the courts, instead.

This is a great book but there is a catch. The problem is that this book keeps you in statutory civil courts that are also known as the corporate kangaroo courts where the judges take an oath to uphold the corporate constitution and not the constitution Of the People guaranteeing your rights as a sovereign. The constitution the average American is thinking of is written in common law language and so must be upheld in a common law court of record where the prosecution or the person suffering damages will be in charge of the court not the judge or attorneys. See your state constitution on courts of record. Habeas corpus is a privilege that the federal government tries to regulate, no right or privilege can be regulated by any government. The servant can not control the master. the People protected by and creators of the constitution and government can not be controlled by it, just as you, a man can not control your God. The government has no rights and codes, statutes, regulations are not for you because you are not the servant. The writer of this book uses codes but that puts him in the statutory courts, he could have done this much easier and quicker without worry if the statute of limitations is up because in common law there are no limitations to your ability to receive a redress of your grievance. No servant government can tell its master that he has a time frame to receive a redress of his rights that were abused! I also hope that he sues all those personally as well as their bonds for just compensation of his rights that have been violated.

Excellent resource even for Attorney's! Well researched and well written! Every Prison Library should have several of these books and every practicing defense attorney should own this, especially those who THINK they know everything about HCs!

Ever thing was great thank you for checking. I will surly let others know how great everything was so once again thank you.
