There are three irrefutable plays at the crap table that if played over any period of time, and as instructed in this book, will make you a big winner for the rest of your life. Yes, I know this is a big claim, and it would be stupid or irresponsible of me to make such a statement without backing it up with solid facts and numbers. Well, the numbers are correct and the math doesn't lie. The 3 irrefutable plays in this book work. In fact, by just practicing one of the plays in any casino will guarantee you a significant mathematical edge. Craps is a fun game when winning. It is also a frustrating game when losing. Mitch has been playing winning craps for more than thirty years. He has seen a lot of players lose a lot of money over the years "and only a few win. The fact is, well over 99 percent of people who play craps are losing players. They lose for a number of reasons, but most lose because they are not serious about the game and even though they may feel they know what to do, they don't know how to do it correctly, consistently and with self-discipline. The casino has an edge. We know this. However, the casino does not have an edge when you exploit flaws from other players, thus giving you a noted advantage that can make you a consistent winner. The 3 irrefutable bets presented in this book are solid, tested, and irrefutable. They have worked for decades, perhaps even as far back as one hundred years ago when modern day craps evolved into the game it is today. The 3 irrefutable bets are the best bets you will ever get from any casino. Customer Reviews

This book was just what I was looking for because I have been to casinos in the past and played craps without doing very well. A craps table can be a very intimidating and even confusing environment with lots of people around the table yelling & shouting. "How to Play Craps and Win!: The 3 Irrefutable Plays that Will Make You a Winner" is the perfect book to learn how to play and win at craps with confidence. The author does an exceptional job of teaching the reader the essentials of playing craps. After reading the part of the book on how to play craps I felt very

confident that I could hold my own at a casino craps table and walk away with money. After reading Chapters 4, 5 & 6 which detailed the three irrefutable plays that will make you a winner at craps, I know for sure that I can definitely walk away a winner from the craps table. This book is a wealth of information on the game of craps. I highly recommend *How to Play Craps and Win!: The 3 Irrefutable Plays that Will Make You a Winner* and I wish I could give this book six stars instead of just five. This book is the real deal when it comes to learning how to play and win at craps. And the author's experience proves it! The author has another book, "Winning Craps," I might get that one too.

I didn't think it was possible to remove the house edge, but after reading this it all makes sense. I'm a beginner to intermediate player and I was not aware of the concepts in this book. My strategy arsenal is now much stronger with adding these Craps techniques.

I'm a complete beginner when it comes to playing craps, but my friends are avid players and have begun introducing me to the game. So, with that being said, it goes without saying that I went into this book with next to no knowledge of the game. Because of this, I was glad to find early on in the read that the author focuses on making everything easy to understand and even though I had to re-read a few sections, I think that the book overall makes a lot of sense as well as being practical and seemingly effective. The section regarding money and bankroll management is definitely something I'm glad to have learned sooner rather than later and that section alone makes me consider this read to be a good investment of my time. I highly recommend it.
